$ASVA Staking on MetaLaunch Goes LIVE!

We are delighted to announce that staking on the MetaLaunch platform is now live. Through our staking platform, $ASVA holders can earn passive income by staking their tokens. The move allows MetaLaunch to demonstrate that it is a leader in the Metaverse space that constantly strives toward empowering and rewarding its community.

More importantly, we are deeply focused on the rapid rise of Metaverse and have etched out our spot as a preferred launchpad for initial metaverse and gaming offering for next tier metaverse and gaming projects. In other words, we are your one-stop platform to fuel the virtual world and gaming economies.

By staking ASVA tokens, you will be eligible to participate in promising IGOs and IMOs launching on MetaLaunch and earn the best APR.

In this article, we will explain how to stake your $ASVA tokens on the MetaLaunch platform and enjoy higher $ASVA rewards!

Let's jump right in!

MetaLaunch Tier Model

MetaLaunch will distribute its IDO allocations according to a set of Meta-Tiers. The more $ASVA an user stakes, the higher tier they will be eligible, along with staking rewards.

$ASVA Staking System

The much anticipated ASVA Staking program on MetaLaunch is finally here.MetaLaunch supports both ASVA Single asset and LP staking.Users will receive attractive APR benefits based on the stake duration they choose.

ASVA Single Asset stake pools

7 days — 6% APR

15 days — 12% APR

30 days — 25 % APR

90 days — 85% APR

ASVA:BUSD LP staking pool

30 days — 46% APR

Important Staking Terms:
